Imagine supplying medical services to a 240 bed hospital running at 150% occupancy with contaminated water that is rationed only two days a week. That's the situation at the Hospital de Occidente, one of six regional hospitals in Honduras.

Old and young patients alike are experiencing additional suffering because the water in the hospital is insufficient, contaminated and unsafe. The community also suffers as a result of the hospital's wastewater being discharged untreated.

Water Missions International has embarked on a project that will:

- **Treat the existing water supply**
- **Increase the water supply by drilling a well**
- **Provide for a new water distribution system**
- **Treat the wastewater**

We know this project will require funding in excess of \$250,000 and will take more than a year to accomplish, but we know that the Lord will provide us with partners and together we will do His work.

Would you be willing to help? If so, please contact us by phone (843-769-7395), email (info@watermissions.org) or mail (P.O. Box 31258, Charleston, SC 29417 USA). Perhaps you may be able to put us in contact with a funding source that would consider making a donation or taking on a portion of this project as a partner.

Water Missions International is a not-for-profit 501 (c) (3) Christian engineering organization, dedicated to meeting the water and spiritual needs of people in all nations and ethnic groups. Our global mission is "to provide access to safe water and an opportunity to hear the 'Living Water' message to 100 million people by the end of 2011."

Changing lives through sustainable water systems
