

Levellogger Software & Firmware

Solinst always recommends using the latest software and firmware release.

Current releases can be downloaded at any time, free of charge, from the Solinst web site at: <https://downloads.solinst.com/>

NOTE:

Solinst always recommends that our customers download the data from their Levelloggers (and barometrically compensate the data, if required), using the same Levellogger Software version they were originally programmed with, before upgrading to a new version of Software.
